

Fault Finding

Sam Sample

Report Generated: 27-09-2020

Introduction

This report is confidential and is intended solely for the person responsible for assessing Sam Sample, who completed the Fault Finding on 07/05/2020.

The contents of this report are likely to be valid for 18 to 24 months.

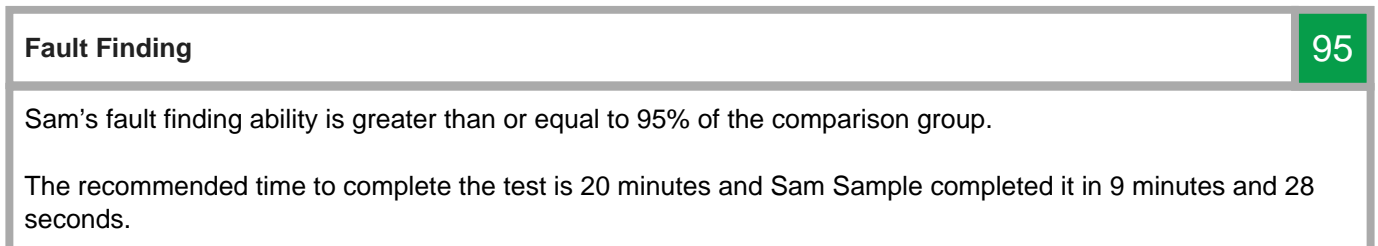

Interpreting Scores

Scores on Fault Finding are calculated by comparing an individual's score with a large group of people (norm group) who have also completed the same tests. Thus, the results are shaped by a meaningful comparison with others. These are then expressed as 'percentiles' and you can use the below scoring key to benchmark Sam's results:

350 General Population

Analysis

This test assesses a candidate's computational thinking and ability to eliminate errors in information. These skills will be apparent when:

- Analysing fault conditions and making recommendations for the repair / restoration of systems
- Demonstrating a careful approach to the control of hazards
- Demonstrating concentration and precision to process
