

Deductive Reasoning

A report for:

Sam Sample

Created 18th July 2023

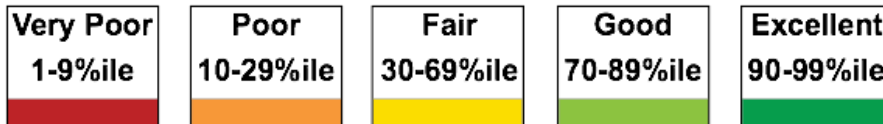

Introduction

This report is confidential and is intended solely for the person responsible for assessing Sam Sample, who completed the Deductive Reasoning on 17/07/2023.

The contents of this report are likely to be valid for 18 to 24 months.

Interpreting Scores

Scores on Deductive Reasoning are calculated by comparing an individual's score with a large group of people (norm group) who have also completed the same tests. Thus, the results are shaped by a meaningful comparison with others. These are then expressed as 'percentiles' and you can use the below scoring key to benchmark Sam's results:

Norm Group: Graduate Job Applicants

Analysis

Deductive Reasoning	91
Sam's deductive reasoning ability is greater than or equal to 91% of the comparison group.	
The recommended time to complete the test is 25 minutes and Sam Sample completed it in 13 minutes and 46 seconds.	

This test assesses a candidate's critical reasoning abilities. These skills will be apparent when:

- **Problem Solving:** Deductive reasoning is essential for identifying and solving complex problems by using logical thinking and drawing conclusions from given premises. It helps in systematically analysing information and determining the most reasonable solutions or outcomes.
- **Risk Assessment:** Deductive reasoning is valuable for assessing risks and making predictions based on available evidence. By logically connecting cause and effect relationships, it allows for identifying potential risks and evaluating their likelihood and impact.
- **Legal and Compliance Analysis:** Deductive reasoning is crucial in legal and compliance-related tasks. It helps in interpreting laws, regulations, and contractual agreements, identifying relevant precedents, and drawing logical conclusions from available evidence. It is also useful for evaluating the compliance of actions or decisions with established guidelines and rules.
